To Whom it May Concern,

I am being subjected to a malicious spying campaign and criminal conspiracy that originates from inside of the government of the United States of America. Criminals inside of the government are actively using spy craft and criminal gangs to follow me, surround me, agitate me, and cause me mental distress every day of my life.

A few years ago, Donald Trump's campaign began spying on my family inside of our home and his team has continued to forcefully intrude into our life ever since. Donald Trump's agents are forcefully raping the privacy of our home and they are maliciously spying on us with a daily display of force against us as we sit peacefully inside of our home. Donald Trump's agents are actively engaging in a war against my life's work and progress. I am accusing Donald Trump and his agents of committing treason.

I do not consent to my work being spied upon. I do not consent to being spied upon inside of our home. I do not consent to being stalked, followed, threatened, or managed by any political parties or government agents - especially not the political campaign and party that surrounds Donald Trump.

I am stating plainly to the world that Donald Trump's campaign and agents have threatened to kill me. Donald Trump's agents actively threaten to injure my wife, and I, in an intentional car accident. To be clear, these agents have already damaged our car on two occasions and these agents use a gang of criminals to follow us around everywhere that we go.

I am presenting this to the world for public review: Donald Trump is illegally spying on my household, is threatening to cause harm to my family, and is actively working every day to cause us mental distress inside of our home.

I have reported all of this to law enforcement and numerous government agencies including members of the United States Congress, Texas Congress, and the Governor of Texas. I have reported this to the United States Secret Service, the Texas Rangers, and the Federal Bureau of Investigation. I am requesting that Donald Trump be arrested for these crimes, and I am advocating for his

imprisonment for the safety and security of the community.

If you are subject to similar forms of harassment from a spying presence that seems to follow your movements and attempts to oppress your daily life, or if you feel that you may be subjected to this illegal spying campaign, then please notify the appropriate law enforcement agencies.

We, the People, should not be oppressed, harassed, and/or threatened by criminals that have access to the national security tools of the United States of America. This is a blatant violation of my Constitutional rights and natural human rights to live a life of dignity and freedom.

On a personal note, there is something very seriously wrong with a mind that would seek to do this to someone else. I used to support Donald Trump. I used to believe in his messages about restoring America, etc. But, now, after being subjected to this spying campaign for several years now, I am plainly stating to the world that Donald Trump is a criminal that belongs in prison.

Thank you for reading. Please feel free to share this message with anyone that you care about so that they will also understand the nature of the threats that we face in our modern world.

Kindest regards,

Chris Carlin
